

APPENDIX TO ANNEX I
PRODUCT SPECIFIC RULES

Interpretative Notes

1. The first column of the list contains chapters, headings or subheadings and the second column contains the description of the goods. For each entry in the first two columns, one or two rules are specified in columns 3 and 4. If the HS code in column 1 is preceded by an “ex”, the rules in column 3 or 4 shall apply only to the part of that chapter, heading or subheading described in column 2. For an entry in the first two columns where a rule is specified in both columns 3 and 4, either one may be applied. If no origin rule is given in column 4, only the rule set out in column 3 shall be applied.
2. Pursuant to subparagraph (b) of Article 2 (General Requirements) of Annex I (Rules of Origin), the product specific rules may be fulfilled by operations in different companies, provided the working or processing takes place within the territory of a Party and fulfils the requirements of the Annex.
3. A product specific rule set out in this Appendix represents the minimum working or processing required to be carried out on non-originating materials for the final goods to obtain originating status. Working or processing exceeding that required by the rule for those goods shall also confer originating status.
4. If a product specific rule specifies that goods may be produced from more than one material, none, one or more materials may be used. It does not require that all of those materials be used.
5. If a product specific rule specifies that goods must be manufactured from a particular material, the rule does not prevent the use of additional materials.
6. If a product specific rule excludes the use of materials classified in certain chapters, headings, or subheadings such excluded materials, if used, must be originating for the goods to qualify as originating.
7. If goods, which have acquired originating status by fulfilling the product specific rule are used as materials in the manufacture of other goods, in determining the origin of the final goods, the rules applicable to the final goods do not apply to those materials. No account shall be taken of the non-originating components of those materials.
8. If the product specific rule provides that “Manufacture from non-originating materials of any heading”, materials of any heading, even materials of the same description and heading as that of the final goods may be used, provided that the process goes beyond minimal operations set out in Annex I (Rules of Origin) and subject to any specific limitations which may also be contained in the rule.

9. The product specific rules in the list will be used to determine origin to qualify for preferential treatment subject to other parts of the Agreement, e.g. tariff commitments on agricultural and non-agricultural products.

10. If the product specific rule provides that “Manufacture in which the value of all non-originating materials used does not exceed X% of the ex-works price of the product,” no change in tariff classification is required. The value criterion shall be computed as follows: value criterion = $\{(PH-EFTA \text{ Material Cost} + \text{Direct Labour Cost} + \text{Overhead Cost} + \text{Other Costs} + \text{Profit}) / \text{Ex Works Price}\} * 100\%$ or value criterion = $\{(\text{Ex Works Price} - \text{Value of Non-Originating Material}) / \text{Ex Works Price}\} * 100\%$.
