RECALLING Articles 4 and 8(3) of the Framework Agreement on conclusion as expeditiously as possible of the negotiations of the agreement on trade in services so as to progressively liberalise and eliminate substantially all discrimination and/or prohibition of new or more discriminatory measures with respect to trade in services between the Parties, and to expand the depth and scope of

HAVE AGREED AS FOLLOWS:

PART I: DEFINITIONS AND SCOPE

Article 1 Definitions

For the purposes of this Agreement:

- (a) “a service supplied in the exercise of governmental authority” means any service which is supplied neither

on a commercial basis, nor in competition with one or more service suppliers;

- (b) “commercial presence” means any type of business or professional establishment, including through
 - (i) the constitution, acquisition or maintenance of a juridical person, or
 - (ii) the creation or maintenance of a branch or a representative office,

within the territory of a Party for the purpose of supplying a service;

- (c) “direct taxes” comprise all taxes on total income, on total capital or on elements of income or of capital, including taxes on gains from the alienation of property, taxes on estates, inheritances and gifts, and taxes on the total amounts of wages or salaries paid by enterprises, as well as taxes on capital appreciation;
- (d) “GATS” means the General Agreement on Trade in Services;
- (e) “juridical person” means any legal entity duly constituted or otherwise organised under applicable law, whether for profit or otherwise, and whether privately-owned or governmentally-owned, including any corporation, trust, partnership, joint venture, sole proprietorship or association;
- (f) “juridical person of another Party” means a juridical person which is either:
 - (i) constituted or otherwise organised under the law of that other Party, and is engaged in substantive

business operations in the territory of that Party or any other Party; or

(ii) in the case of the supply of a service through commercial presence, owned or controlled by:

1. natural persons of that Party; or

2. juridical persons of that other Party identified under subparagraph (i);

(g) a juridical person is:

(i) “owned” by persons of a Party if more than 50 per cent of the equity interest in it is beneficially owned by persons of that Party;

(ii) “controlled” by persons of a Party if such persons have the power to name a majority of its directors or otherwise to legally direct its actions;

(iii) “affiliated” with another person when it controls, or is controlled by, that other person; or when it and the other person are both controlled by the same person;

(h) “measure” means any measure by a Party, whether in the form of a law, regulation, rule, procedure, decision, administrative action, or any other form;

(i) “measures by Parties” means measures taken by

(i) central, regional or local governments and authorities; and

- (ii) non-governmental bodies in the exercise of powers delegated by central, regional or local governments or authorities;
- (j) “measures by Parties affecting trade in services” include measures in respect of
 - (i) the purchase, payment or use of a service;
 - (ii) the access to and use of, in connection with the supply of a service, services which are required by the Parties to be offered to the public generally;
 - (iii) the presence, including commercial presence, of persons of a Party for the supply of a service in the territory of another Party;
- (k) “monopoly supplier of a service” means any person, public or private, which in the relevant market of the territory of a Party is authorised or established formally or in effect by that Party as the sole supplier of that service;
- (l) “natural person of another Party” means a natural person who resides in the territory of that other Party or elsewhere, and who under the law of that other Party:
 - (i) is a national of that other Party; or

- (ii) has the right of permanent residence¹ in that other Party, in the case of a Party which accords substantially the same treatment to its permanent residents as it does to its nationals in respect of measures affecting trade in services, as notified after the entry into force of this Agreement provided that no Party is obliged to accord to such permanent residents treatment more favourable than would be accorded by that other Party to such permanent residents. Such notification shall include the assurance to assume, with respect to the permanent residents, in accordance with its laws and regulations, the same responsibilities that other Party bears with respect to its nationals;
- (m) “person” means either a natural person or a juridical person;
- (n) “sector” of a service means,

¹ In the case of Indonesia, Lao PDR, Thailand, Viet Nam and China, natural person of another Party shall be limited to a natural person who resides in the territory of that other Party or elsewhere and who under the law of that other Party is a national of that other Party. Therefore, in line with the principle of reciprocity, this Agreement shall not apply to the permanent residents of Indonesia, Lao PDR, Thailand, Viet Nam, and China. Once any of these Parties enacts its domestic law on the treatment of permanent residents of another Party or non-party, there shall be negotiations on the issue of whether to include permanent residents in the coverage of natural person under this Agreement in respect of that Party.

 - (ii) in the territory of a Party to the service consumer of any other Party (“consumption abroad”);

² Where the service is not supplied directly by a juridical person but through other forms of commercial presence such as a branch or a representative office, the service supplier (i.e. the juridical person) shall, nonetheless, through such presence be accorded the treatment provided for service suppliers under this Agreement. Such treatment shall be extended to the presence through which the service is supplied and need not be extended to any other parts of the supplier located outside the territory where the service is supplied.

- (iii) by a service supplier of a Party, through commercial presence in the territory of any other Party (“commercial presence”);

 - (b) regulations or requirements governing the procurement by governmental agencies of services purchased for governmental purposes and not with a view to commercial resale or with

a view to use in the supply of services for commercial sale.

PART II: OBLIGATIONS AND DISCIPLINES

Article 3 Transparency

Article III of the GATS is, *mutatis mutandis*, incorporated into and shall form an integral part of this Agreement.

Article 4 Disclosure of Confidential Information

Article III *bis* of the GATS is, *mutatis mutandis*, incorporated into and shall form an integral part of this Agreement.

Article 5 Domestic Regulation

1. In sectors where specific commitments are undertaken under Part III, each Party shall ensure that all measures of general application affecting trade in services are administered in a reasonable, objective and impartial manner.
2. (a) Each Party shall maintain or institute as soon as practicable judicial, arbitral or administrative tribunals or procedures which provide, at the request of an affected service supplier, for the prompt review of, and where justified, appropriate remedies for, administrative decisions affecting trade in services. Where such procedures are not independent of the agency entrusted with the

administrative decision concerned, the Party shall ensure that the procedures in fact provide for an objective and impartial review.

(b) The provisions of subparagraph (a) shall not be construed to require a Party to institute such tribunals or procedures where this would be inconsistent with its constitutional structure or the nature of its legal system.

3. Where authorisation is required for the supply of a service on which a specific commitment under this Agreement has been made, the competent authorities of each Party shall:

(a) in the case of an incomplete application, at the request of the applicant, identify all the additional information that is required to complete the application and provide the opportunity to remedy deficiencies within a reasonable timeframe;

(b) at the request of the applicant, provide without undue delay, information concerning the status of the application; and

(c) if an application is terminated or denied, to the maximum extent possible, inform the applicant in writing and without delay the reasons for such action. The applicant will have the possibility of resubmitting, at its discretion, a new application.

4. With the objective of ensuring that measures relating to qualification requirements and procedures, technical standards and licensing requirements do not constitute unnecessary barriers to trade in services, the Parties shall jointly review the results of the negotiations on disciplines on these measures, pursuant to Article VI.4

of GATS, with a view to their incorporation into this Agreement. The Parties note that such disciplines aim to ensure that such requirements are, *inter alia*:

- (a) based on objective and transparent criteria, such as competence and the ability to supply the service;
 - (b) not more burdensome than necessary to ensure the quality of the service;
 - (c) in the case of licensing procedures, not in themselves a restriction on the supply of the service.
5. (a) In sectors in which a Party has undertaken specific commitments under Part III, pending the incorporation of the disciplines referred to in paragraph 4 of this Article, that Party shall not apply licensing and qualification requirements and technical standards that nullify or impair its obligation under this Agreement in a manner which:
- (i) does not comply with the criteria outlined in subparagraphs 4(a), (b) or (c) of this Article; and
 - (ii) could not reasonably have been expected of that Party at the time the specific commitments in those sectors were made.
- (b) In determining whether a Party is in conformity with the obligation under paragraph 5(a) of this Article, account shall be taken of international

standards of relevant international organisations⁴
applied by that Party.

6. In sectors where specific commitments regarding professional services are undertaken, each Party shall provide for adequate procedures to verify the competence of professionals of any other Party.

Article 6

Recognition

1. For the purposes of fulfilment of their respective standards or criteria for the authorisation, licensing or certification of service suppliers, each Party may recognise the education or experience obtained, requirements met, or licenses or certifications granted in another Party. Such recognition, which may be achieved through harmonisation or otherwise, may be based upon an agreement or arrangement between the Parties or the relevant competent bodies or may be accorded autonomously.
2. Two or more Parties may enter into, or encourage their relevant competent bodies to enter into, negotiations on recognition of qualification requirements, qualification procedures, licensing and/or registration procedures for the purposes of fulfilment of their respective standards or criteria for the authorisation, licensing or certification of service suppliers.
3. A Party that is a party to an agreement or arrangement of the type referred to in paragraph 1 of this Article, whether existing or future, shall afford adequate opportunity for other interested Parties to negotiate

⁴ The term "relevant international organisations" refers to international bodies whose membership is open to the relevant bodies of at least all Parties of this Agreement.

their accession to such an agreement or arrangement or to negotiate comparable ones with it. Where a Party accords recognition autonomously, it shall afford adequate opportunity for any other Party to demonstrate that education, experience, licenses, or certifications obtained or requirements met in that other Party's territory should be recognised.

4. A Party shall not accord recognition in a manner which would constitute a means of discrimination between countries in the application of its standards or criteria for the authorisation, licensing or certification of services suppliers, or a disguised restriction on trade in services.

Article 7

Monopolies and Exclusive Service Suppliers

1. Each Party shall ensure that any monopoly supplier of a service in its territory does not, in the supply of the monopoly service in the relevant market, act in a manner inconsistent with that Party's obligations under specific commitments.
2. Where a Party's monopoly supplier competes, either directly or through an affiliated company, in the supply of a service outside the scope of its monopoly rights and which is subject to that Party's specific commitments, the Party shall ensure that such a supplier does not abuse its monopoly position to act in its territory in a manner inconsistent with such commitments.
3. If any Party has reason to believe that a monopoly supplier of a service of any other Party is acting in a manner inconsistent with paragraph 1 or 2 of this

Article, that Party may request the Party establishing, maintaining or authorising such supplier to provide specific information concerning the relevant operations.

4. The provisions of this Article shall also apply to cases of exclusive service suppliers, where a Party, formally or in effect,
 - (a) authorises or establishes a small number of service suppliers; and
 - (b) substantially prevents competition among those suppliers in its territory.

Article 8 Business Practices

1. The Parties recognise that certain business practices of services suppliers, other than those falling under Article 7, may restrain competition and thereby restrict trade in services.
2. Each Party shall, at the request of any other Party (the “Requesting Party”), enter into consultations with a view to eliminating practices referred to in paragraph 1 of this Article. The Party addressed (the “Requested Party”) shall accord full and sympathetic consideration to such a request and shall cooperate through the supply of publicly available non-confidential information of relevance to the matter in question. The Requested Party shall also provide other information available to the Requesting Party, subject to its domestic law and to the conclusion of satisfactory agreement concerning the safeguarding of its confidentiality by the Requesting Party.

Article 9 Safeguards

1. The Parties note the multilateral negotiations pursuant to Article X of the GATS on the question of emergency safeguard measures based on the principle of non-discrimination. Upon the conclusion of such multilateral negotiations, the Parties shall conduct a review for the purpose of discussing appropriate amendments to this Agreement so as to incorporate the results of such multilateral negotiations.
2. In the event that the implementation of this Agreement causes substantial adverse impact to a service sector of a Party before the conclusion of the multilateral negotiations referred to in paragraph 1 of this Article, the affected Party may request for consultations with the other Party for the purposes of discussing any measure with respect to the affected service sector. Any measure taken pursuant to this paragraph shall be mutually agreed by the Parties concerned. The Parties concerned shall take into account the circumstances of the particular case and give sympathetic consideration to the Party seeking to take a measure.

Article 10 Payments and Transfers

1. Except under the circumstances envisaged in Article 11, a Party shall not apply restrictions on international transfers and payments for current transactions relating to its specific commitments.
2. Nothing in this Agreement shall affect the rights and obligations of any Party who is a member of the International Monetary Fund under the Articles of

Agreement of the Fund, including the use of exchange actions which are in conformity with the Articles of Agreement of the Fund, provided that a Party shall not impose restrictions on any capital transactions inconsistently with its specific commitments regarding such transactions, except under Article 11 or at the request of the Fund.

Article 11

Restrictions to Safeguard the Balance of Payments

Where a Party is in serious balance of payments and external financial difficulties or threat thereof, it may adopt or maintain restrictions on trade in services in accordance with Article XII of the GATS.

Article 12

General Exceptions

Subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between Parties where like conditions prevail, or a disguised restriction on trade in services, nothing in this Agreement shall be construed to prevent the adoption or enforcement by any Party of measures:

- (a) necessary to protect public morals or to maintain public order;⁵
- (b) necessary to protect human, animal or plant life or health;

⁵ The public order exception may be invoked only where a genuine and sufficiently serious threat is posed to one of the fundamental interests of society.

- (c) necessary to secure compliance with laws or regulations which are not inconsistent with the provisions of this Agreement including those relating to:
 - (i) the prevention of deceptive and fraudulent practices or to deal with the effects of a default on services contracts;
 - (ii) the protection of the privacy of individuals in relation to the processing and dissemination of personal data and the protection of confidentiality of individual records and accounts;
 - (iii) safety;
- (d) inconsistent with Article 19, provided that the difference in treatment is aimed at ensuring the equitable or effective⁶ imposition or collection of direct taxes in respect of services or service suppliers of other Parties;

⁶ Measures that are aimed at ensuring the equitable or effective imposition or collection of direct taxes include measures taken by a Party under its taxation system which:

- (i) apply to non-resident service suppliers in recognition of the fact that the tax obligation of non-residents is determined with respect to taxable items sourced or located in the Party's territory; or
- (ii) apply to non-residents in order to ensure the imposition or collection of taxes in the Party's territory; or
- (iii) apply to non-residents or residents in order to prevent the avoidance or evasion of taxes, including compliance measures; or
- (iv) apply to consumers of services supplied in or from the territory of another Party in order to ensure the imposition or collection of taxes on such consumers derived from sources in the Party's territory; or
- (v) distinguish service suppliers subject to tax on worldwide taxable items from other service suppliers, in recognition of the difference in the nature of the tax base between them; or
- (vi) determine, allocate or apportion income, profit, gain, loss, deduction or credit of resident persons or branches, or between related persons or branches of the same person, in order to safeguard the Party's tax base.

Tax terms or concepts in subparagraph (d) of Article 12 and in this footnote are determined according to tax definitions and concepts, or equivalent or similar definitions and concepts, under the domestic law of the Party taking the measure.

- (e) provided that the difference in treatment is the result of an agreement on the avoidance of double taxation or provisions on the avoidance of double taxation in any other international agreement or arrangement by which the Party is bound.

Article 13 Security Exceptions

Nothing in this Agreement shall be construed:

- (a) to require any Party to furnish any information, the disclosure of which it considers contrary to its essential security interests; or
- (b) to prevent any Party from taking any action which it considers necessary for the protection of its essential security interests, including but not limited to:
 - (i) action relating to fissionable and fusionable materials or the materials from which they are derived;
 - (ii) action relating to the traffic in arms, ammunition and implements of war and to such traffic in other goods and materials as is carried on directly or indirectly for the purpose of supplying a military establishment;
 - (iii) action taken so as to protect critical communications infrastructure from deliberate attempts intended to disable or degrade such infrastructure;

- (iv) action taken in time of war or other emergency in domestic or international relations; or
- (c) to prevent any Party from taking any action in pursuance of its obligations under the United Nations Charter for the maintenance of international peace and security.

Article 14 Subsidies

1. Except where provided in this Article, this Agreement shall not apply to subsidies or grants provided by a Party, or to any conditions attached to the receipt or continued receipt of such subsidies or grants, whether or not such subsidies or grants are offered exclusively to domestic services, service consumers or service suppliers. If such subsidies or grants significantly affect trade in services committed under this Agreement, any Party may request for consultations with a view to an amicable resolution of this matter.
2. Pursuant to this Agreement, the Parties shall:
 - (a) on request, provide information on subsidies related to trade in services committed under this Agreement to any requesting Party; and
 - (b) review the treatment of subsidies when relevant disciplines are developed by the WTO.

Article 15 WTO Disciplines

Subject to any future agreements as may be agreed pursuant to reviews of this Agreement by the Parties under Article 27, the Parties hereby agree and reaffirm their commitments to abide by the provisions of the WTO agreements as are relevant and applicable to trade in services.

Article 16 Cooperation

The Parties shall strengthen cooperation efforts in services sectors, including sectors which are not covered by existing cooperation arrangements. The Parties shall discuss and mutually agree on the sectors for cooperation and develop cooperation programmes in these sectors in order to improve their domestic capacities, efficiencies and competitiveness.

Article 17 Increasing Participation of Cambodia, Lao PDR, Myanmar and Viet Nam

The increasing participation of Cambodia, Lao PDR, Myanmar, and Viet Nam in this Agreement shall be facilitated through negotiated specific commitments, relating to:

- (a) the strengthening of their domestic services capacity and its efficiency and competitiveness, *inter alia* through access to technology on a commercial basis;
- (b) the improvement of their access to distribution channels and information networks;

- (c) the liberalisation of market access in sectors and modes of supply of export interest to them; and
- (d) appropriate flexibility for Cambodia, Lao PDR, Myanmar, and Viet Nam for opening fewer sectors, liberalising fewer types of transactions and progressively extending market access in line with their respective development situation.

PART III: SPECIFIC COMMITMENTS

Article 18 Market Access

1. With respect to market access through the modes of supply identified in Article 1(t)(i)-(iv), a Party shall accord services and service suppliers of any other Party treatment no less favourable than that provided for under the terms, limitations and conditions agreed and specified in its Schedule.⁷
2. In sectors where market-access commitments are undertaken, the measures which a Party shall not maintain or adopt either on the basis of a regional subdivision or on the basis of its entire territory, unless otherwise specified in its Schedule, are defined as:
 - (a) limitations on the number of service suppliers whether in the form of numerical quotas, monopolies, exclusive service suppliers or the requirements of an economic needs test;

⁷ If a Party undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in Article 1(t)(i) and if the cross-border movement of capital is an essential part of the service itself, that Party is thereby committed to allow such movement of capital. If a Party undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in Article 1(t)(iii), it is thereby committed to allow related transfers of capital into its territory.

- (b) limitations on the total value of service transactions or assets in the form of numerical quotas or the requirement of an economic needs test;
- (c) limitations on the total number of service operations or on the total quantity of service output expressed in terms of designated numerical units in the form of quotas or the requirement of an economic needs test;⁸
- (d) limitations on the total number of natural persons that may be employed in a particular service sector or that a service supplier may employ and who are necessary for, and directly related to, the supply of a specific service in the form of numerical quotas or the requirement of an economic needs test;
- (e) measures which restrict or require specific types of legal entity or joint venture through which a service supplier may supply a service; and
- (f) limitations on the participation of foreign capital in terms of maximum percentage limit on foreign shareholding or the total value of individual or aggregate foreign investment.

Article 19

National Treatment

1. In the sectors inscribed in its Schedule, and subject to any conditions and qualifications set out therein, each

⁸ Subparagraph 2(c) of this Article does not cover measures of a Party which limit inputs for the supply of services.

Party shall accord to services and service suppliers of any other Party, in respect of all measures affecting the supply of services, treatment no less favourable than that it accords to its own like services and service suppliers⁹.

2. A Party may meet the requirement of paragraph 1 of this Article by according to services and service suppliers of any other Party, either formally identical treatment or formally different treatment to that it accords to its own like services and service suppliers.
3. Formally identical or formally different treatment shall be considered to be less favourable if it modifies the conditions of competition in favour of services or service suppliers of the Party compared to like services or service suppliers of any other Party.

Article 20 Additional Commitments

The Parties may negotiate commitments with respect to measures affecting trade in services not subject to scheduling under Articles 18 and 19 including those regarding qualifications, standards or licensing matters. Such commitments shall be inscribed in a Party's Schedule.

Article 21 Schedule of Specific Commitments

2. Each Party shall set out in a schedule the specific commitments it undertakes under Articles 18, 19 and 20. With respect to sectors where such commitments are undertaken, each Schedule shall specify:
 - (a) the sectors in which such commitments are undertaken;

4. If the Parties concerned are unable to reach an agreement on the compensatory adjustment, the matter shall be resolved by arbitration under the Agreement on Dispute Settlement Mechanism of the Framework Agreement. The modifying Party may not modify or withdraw its commitment until it has made compensatory adjustments in conformity with the findings of the arbitration.

5. If the modifying party implements its proposed modification or withdrawal and does not comply with the findings of the arbitration, any Party that participated in the arbitration may modify or withdraw substantially equivalent benefits in conformity with those findings. Notwithstanding Article 22, such a modification or withdrawal may be implemented solely with respect to the modifying Party.

REFERENCE PAPER

I. SCOPE

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that

- (a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

- (a) control over essential facilities; or
- (b) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

- (a) engaging in anti-competitive cross-subsidization;
- (b) using information obtained from competitors with anti-competitive results; and
- (c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4 Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time; or
- (b) after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Party has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-

competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Party.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence; and
- (b) the terms and conditions of individual licenses.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

Appendix 1

Reference Paper

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that:

- (a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

- (a) control over essential facilities; or
- (b) use of its position in the market.

1. Competitive safeguards

1.1 Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2 Safeguards

The anti-competitive practices referred to above shall include in particular:

- (a) engaging in anti-competitive cross-subsidization;
- (b) using information obtained from competitors with anti-competitive results; and
- (c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1 This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

CHINA - SCHEDULE OF SPECIFIC COMMITMENTS

For the 2nd Package of Commitments under ASEAN - China FTA Trade in Services

2.2 Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3 Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4 Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5 Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time; or
- (b) after a reasonable period of time which has been made publicly known

to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licensing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence; and

CHINA - SCHEDULE OF SPECIFIC COMMITMENTS

For the 2nd Package of Commitments under ASEAN - China FTA Trade in Services

(b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

Note by the Chairman

Revision

It has been suggested by a number of delegations that it might be helpful to produce a brief and simple note on assumptions applicable to the scheduling of commitments in basic telecoms. The purpose of the attached note is to assist delegations in ensuring the transparency of their commitments and to promote a better understanding of the meaning of commitments. This note is not intended to have or acquire any binding legal status.

NOTES FOR SCHEDULING BASIC TELECOM SERVICES COMMITMENTS

1. Unless otherwise noted in the sector column, any basic telecom service listed in the sector column:
 - (a) encompasses local, long distance and international services for public and non-public use;
 - (b) may be provided on a facilities-basis or by resale; and
 - (c) may be provided through any means of technology (e.g., cable⁹, wireless, satellites).
2. Subsector (g) --private leased circuit services -- involves the ability of service suppliers to sell or lease any type of network capacity for the supply of services listed in any other basic telecom service subsector unless otherwise noted in the sector column. This would include capacity via cable, satellite and wireless network.
3. In view of points 1 and 2 above, it should not be necessary to list cellular or mobile services as a separate subsector. However, a number of Members have done so, and a number of offers have commitments only in these subsectors. Therefore, in order to avoid extensive changes in schedules, it would seem appropriate for Members to maintain separate entries for these subsectors.

⁹Including all types of cable.

CHAIRMAN'S NOTE

Market Access Limitations on Spectrum Availability

Many Members have entries in the market access column of their schedules indicating that commitments are "subject to availability of spectrum/frequency" or similar wording. In light of the physical nature of spectrum and the constraints inherent in its use, it is understandable that Members may have sought to rely on these words to adequately protect legitimate spectrum management policies. There is, however, doubt that words such as "subject to availability of spectrum/frequency" as listed in the market access column of many Members' schedules achieve that objective.

Spectrum/frequency management is not, *per se*, a measure which needs to be listed under Article XVI. Furthermore under the GATS each Member has the right to exercise spectrum/frequency management, which may affect the number of service suppliers, provided that this is done in accordance with Article VI and other relevant provisions of the GATS. This includes the ability to allocate frequency bands taking into account existing and future needs. Also, Members which have made additional commitment in line with the Reference Paper on regulatory principles are bound by its paragraph 6.

Therefore, words such as "subject to availability of spectrum/frequency" are unnecessary and should be deleted from Members' schedules.

Appendix 2

Distribution Services

Distribution trade services are comprised of four main sub-sectors:

- commission agents services;
- wholesaling;
- retailing; and
- franchising.

The principal services rendered in each subsector can be characterized as reselling merchandise, accompanied by a variety of related subordinated services, including inventory management; assembly, sorting and grading of bulk lots; breaking bulk lots and redistributing into smaller lots; delivery services; refrigeration, storage, warehousing and garage services; sales promotion, marketing and advertising, installation and after sales services including maintenance and repair and training services. Distribution services are generally covered by CPC 61, 62, 63 and 8929.

Commission Agents' Services consist of sales on a fee or contract basis by an agent, broker or auctioneer or other wholesalers of goods/merchandise and related subordinated services.

Wholesaling consist of the sale of goods/merchandise to retailers to industrial, commercial, institutional, or other professional business users, or to other wholesalers and related subordinated services.

Retailing services consist of the sale of goods/merchandise for personal or household consumption either from a fixed location (e.g., store, kiosk, etc.) or away from a fixed location and related subordinated services.

Franchising services consist of the sale of the use of a product, trade name or particular business format system in exchange for fees or royalties. Product and trade name franchising involves the use of a trade name in exchange for fees or royalties and may include an obligation for exclusive sale of trade name products. Business format franchising involves the use of an entire business concept in exchange for fees and royalties, and may include the use of a trade name, business plan, and training materials and related subordinated services.

Appendix 3

Insurance: Definition of "Master Policy"

Master policy is the policy that provides blanket coverage for the same legal person's property and liabilities located in different places. Master policy may only be issued by the business department of an insurer's head office or that of its authorized province-level branch offices. Other branches are not allowed to issue master policy.

Master policy business with the state key construction projects as its subject-matter insured. If investors on the state key construction projects (i.e., projects that are so listed and annually announced by the State Development and Planning Commission) meet either of the following requirements, they may purchase master policy from insurers that are located in the same place as the investors' legal persons do.

The investment on the subject-matter insured is all from China (including the reinvestment from the foreign-invested enterprises in China), and the sum of investment of the investor accounts for over 15 per cent of the total investment.

The investment is partially from abroad, and partially from China (including the reinvestment from the foreign-invested enterprises in China), and the sum of investment of the Chinese investor accounts for over 15 per cent for the total domestic investment.

For those projects that draw investment all from abroad, every insurer may provide coverage in the form of master policies.

Master policy covering different subjects-matter insured of the same legal person. For those subjects-matter insured located in different places and owned by the same legal person (excluding financial, railway, and post and telecommunications industries and enterprises), master policy may be issued on the basis of either of the following conditions.

For the sake of payment of premium tax, insurance companies incorporated where the legal person or accounting unit of the insurance applicant is located are allowed to issue master policy.

If over 50 per cent of insurance amount of the subject-matter insured is from a larger or medium sized city, then insurers in that city are allowed to issue master policy, no matter whether the insurance applicant's legal person or accounting unit is located in the city.

Motor insurance, credit insurance, employer liabilities insurance, statutory insurance, and other insurance business excluded by the CIRC can not be underwritten or co-insured by insurers located other than where the subject-insured are located, or covered under a master policy.

Philippine Reference Paper on Regulatory Principles in Telecommunications Services

The commitments in telecommunication services are in accordance with the General Agreement on Trade in Services and its Annex on Telecommunications. In support of market access commitments undertaken, the following principles will form the basis for the regulatory framework in basic telecommunications.

1. Competitive safeguard

Appropriate measures shall be maintained for the purpose of preventing suppliers from engaging in or continuing anti-competitive practices.

2. Interconnection

In order to achieve viable, efficient, reliable and universal telecommunications services, a fair and reasonable interconnection of facilities of authorized public network operators and other providers of telecommunications services shall be provided.

Interconnection shall be at any technically feasible point in the network, under non-discriminatory terms and conditions, in a timely fashion, and on terms and conditions that are fair, transparent and reasonable.

A service supplier requesting interconnection with another supplier will have recourse after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal Service

Universal service obligations, as may be defined by the appropriate Authority, shall be administered in a transparent, non-discriminatory and competitively neutral manner. Authorized international gateway and mobile cellular telephone service providers are required by law to install a set number of local exchange lines in designated areas.

4. Public availability of licensing criteria

Where a license is required, the following shall be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a license;
- (b) the terms and conditions of individual licenses

The reasons for the denial of a license will be made known to the applicant upon request.

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

The regulation of telecommunication suppliers shall rely principally on an administrative process that is stable, transparent and fair, giving due emphasis to technical, legal, economic and financial considerations, and with due regard to the observance of due process at all times.

A national consultative forum shall be maintained to allow interaction among the telecommunications industries, user groups, and academic and research institutions on important issues in the field of communications.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, which are frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that:

- (a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in relevant market for basic telecommunications services as a result of:

- (a) control over essential facilities; or
- (b) use of its position in the market.

1. Competitive safeguards

1.1. Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2. Safeguards

CAMBODIA - SCHEDULE OF SPECIFIC COMMITMENTS
For the 2nd Package of Commitments under ASEAN - China FTA Trade in Services

The anti-competitive practices referred to above shall include in particular:

- (a) engaging in anti-competitive cross-subsidization;
- (b) using information obtained from competitors with anti-competitive results; and
- (c) not making available to other services suppliers on timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

2.1. This section applies to linking with suppliers, providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2. Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided:

- (a) under non-discriminatory terms, conditions (incl. technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) in a timely fashion, on terms, conditions (incl. technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3. Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

CAMBODIA - SCHEDULE OF SPECIFIC COMMITMENTS
For the 2nd Package of Commitments under ASEAN - China FTA Trade in Services

2.4. Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5. Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) at any time or
- (b) after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. Public availability of licencing criteria

Where a licence is required, the following will be made publicly available:

- (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and
- (b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

CAMBODIA - SCHEDULE OF SPECIFIC COMMITMENTS

For the 2nd Package of Commitments under ASEAN - China FTA Trade in Services

5. Independent regulators

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. Allocation and use of scarce resources

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands will be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.
